

Data Collection

Before you begin, the test administrators will note your age; level of familiarity with VR technology; and level of medical knowledge.

Phase 1: Learn

You will be given a pdf document detailing the absorption capacity of various medical supplies that are used to manage postpartum blood loss.

Within 5 minutes, please memorise the information given to the best of your ability.

Phase 2: Practice

You will be given a pdf document containing 6 exercises, for you to practice applying the information memorised.

Within 5 minutes, please go through the practices and check your answers using the provided answer key.

Phase 3: Test

You will be presented with 6 test scenarios, using in life-size representations of the medical supplies taught. The test administrators will take note of the accuracy and speed of your responses.

Phase 1: Learn

Complete a VR simulation detailing the absorption capacity of various medical supplies that are used to manage postpartum blood loss.

Within 5 minutes, please memorise the information given to the best of your ability.

Phase 2: Practice

Complete a VR simulation containing 6 exercises, for you to practice applying the information memorised.

Within 5 minutes, please go through the practices and check your answers using the provided answer key.
